

# Afrobeat Example 1

♩ 110

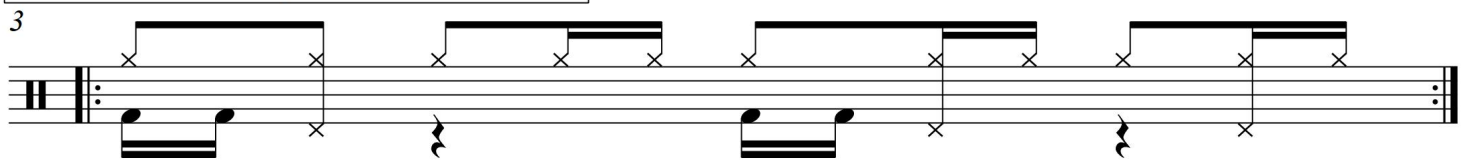

This is the first afrobeat pattern is created by legendary master drummer Tony Allen

Start with the hi-hat pattern. Practice it until you get a flowing feel between the relation with hi-hat pedal sound and regular closed hi-hat stroke.

Next, add to bass drum parts on the beat 1 and 3.

After you add the snare drum parts you end up with the first written pattern of afrobeat!
